MIGALOO
HOME

cork's oak trees after collecting cork on the cork farm in PORTUGAL.

The product has unique functional properties.

It is very unique product which is made from the tree BUT THERE IS NO NEED TO CUT THE TREE to produce it.

Happy trees - happy people :)

The product is made in the spirit - zero waste. In its production, we do not use water, which is of great importance for our planet. The production also does not emit carbon dioxide.

The product is 100% hand-made in a Polish workshop by artists.

The resin used in its production has an increased carbon composition compared to commonly used resins, which increases its biodegradability.

Cork decor countertops do not emit harmful substances such as formaldehyde, commonly used in filling boards. It is a biologically neutral surface.

Cork has special anti-mold properties, does not soak, does not discolor.
Design can be controlled on the production line - many different options in the range.

Product patented by Monika Blazkowska

NATURAL TERRAZO

funky nature looking style for all generations

CORK DECOR

brings to your home natural smell of Portuguese's forests
help you to create life balance creating natural harmony
between industrial production and touch of nature,

it is like a blessing exercise of going back to our roots
of going back to the Mother Earth

from the top image looks like wood being floated on the river...
it is also very helpful to create furniture that help disable
people to marked the zones on the flat surface.

you can feel natural skin of the real tree with your fingertips.
